

Redwood School

Student Support Centre

The SSC strives to provide each student with a diverse mix of the best active learning opportunities and resources to maximise their potential as we prepare them for adulthood.

The main focus is around communication and the students use a range of communication aids depending upon their level of ability and need. Visual aids are used in the classrooms and around school.

Students have individual targets set using SCERTS and targets from the students EHCP and these are worked towards on a daily bases. Classes go out in the community and look at the real world such as going shopping, exchanging money and taking part in leisure activities.

Regular themed cross curricular events take place throughout the year, including World Book Day, NAS awareness week and focused curriculum days.

All of these experiences do not only provide valuable learning experiences, but also promote positive, engaged and independent learners in preparation for adulthood.
