

## Informal, with access to Semi-Formal: Initiate, My Communication

The English curriculum for our Initiate learners is highly personalised and focuses on tailoring the learning experience to meet individual needs, strengths, and learning styles. This approach allows us to set personalised goals and provide adapted instruction and resources to support progress.

Key aspects include individualised learning plans, targeted interventions, and ongoing assessment to track progress. The English curriculum employs a combination of structured learning activities with hands-on practical discovery and real-life experiences and there will be opportunities for promoting reading, writing and speaking and listening skills throughout the school day.
