

Pre-Formal Experiential, My Independence

Redwood's sensory and/or physical curriculum for experiential learners is designed to support learners with profound and complex learning needs, including physical disabilities and sensory impairments. Here are the key features:

1. **Holistic Sensory-Based Curriculum:** The curriculum integrates sensory experiences to support physical development and sensory processing
2. **Therapeutic Approach:** Emphasis on therapeutic methods to enhance physical development and sensory integration
3. **High Level of Adult Support:** learners receive extensive adult assistance to address both their learning and personal care needs
4. **Adaptive Learning Environment:** The learning environment is tailored to the needs of the learners, ensuring a structured and supportive setting

This approach aims to create a supportive and engaging learning environment, helping learners develop essential sensory and physical skills.
