

Pre-Formal Experiential, My Health

Redwood's social, emotional, and mental health curriculum for experiential learners is designed to support learners with profound and complex learning needs. Here are the key features:

- 1. Holistic Sensory-Based Curriculum:** The curriculum integrates sensory experiences to support social, emotional, and mental health development
- 2. Therapeutic Approach:** Emphasis on therapeutic methods to enhance personal, social, and emotional development
- 3. High Level of Adult Support:** learners receive extensive adult assistance to address both their learning and personal care needs
- 4. Structured Learning Environment:** The learning environment is designed to be functional and related to the learners' own experiences

This approach aims to create a supportive and engaging learning environment, helping learners develop essential social, emotional, and mental health skills.
