

Pre-Formal Experiential, My Thinking

Learners on the Experiential Pathway will be exposed to early mathematical concepts through practical, sensory-rich experiences. The focus is on developing foundational skills in number, shape, space, and measure, closely linked to EHCP outcomes. Key features include:

- Daily exposure to number songs, counting, and quantity through real-life contexts.
- Repeated exposure to early concepts such as size, more/less, and full/empty through play.
- Exploration of shape, pattern, and spatial awareness using hands-on materials.
- Exposure to time, routine, and sequencing via visual schedules and structured activities.
- Development of early problem-solving through meaningful, everyday tasks.
